

FINISH YOUR SEARCH FOR A TOTAL WATERBORNE SOLUTION.

End the guess work on how to complete your waterborne system with Col-Met TWS...your Total Waterborne Solution. TWS is a combination of technologies, configurations and systems that meet your specific waterborne flash-off requirements. Consult your paint supplier or jobber and ask for their personal recommendation for what fits your specific finishing requirements and let Col-Met fill those needs.

It's not one idea that's "made for everybody", but instead it's a set of solutions designed just for you. Achieve the optimal waterborne flash-off process with Col-Met's TWS.

EVO Portable

EVO-1 portable tower with rolling stand, includes manual timer for setting cycle time, and doesn't require extensive air purification system.

EVO Stationary

EVO-4 standard tower system with installed air towers that operate simultaneously or independently, includes in-booth remote starter, and provides retrofit solution for any spray booth brand.

EVO Pneumatic In-Booth Switch

VS Precision Remote Control Panel

VS variable-speed system has adjustable timer on control panel as required by paint suppliers, and offers precise control of booth airflow when switching from spray cycle to flash-off cycle.

COL-MET TWS. YOUR SEARCH IS OVER.
