## ATR/AR AIR MAKEUP UNITS

Designed for optimum fuel efficiency, Col-Met ATR/AR EZ Heat and Cure Air Makeup Units deliver conditioned and filtered heated air evenly throughout your booth. Precision-controlled to minimize temperature variations, they effectively remove particulates from the air that can negatively affect the quality of your finish.

By utilizing 1.5 to 4 million BTU direct-fired burners, our motorized auto gas control delivers a consistent burn for an evenly heated airflow into the booth. With self-adjusting profile and inlet dampers, the EZ Heat and Cure modulates airflow as it passes over the burners, regulating air pressure and fuel consumption for a clean, fuel-efficient burn. Our air makeup units have exclusive features for safer operations and enhanced operator comfort. Fuel-efficient and designed for better finishing, experience a level of quality and control you can only expect from Col-Met.

### **BETTER RESULTS WITH ATR/AR EZ HEAT AND CURE:**

- EASIER INSTALLATION AND SETUP
- REDUCED TOTAL ENERGY COSTS
- ENHANCED FINISHING APPLICATIONS DUE TO REDUCED AIR PARTICULATES
- DECREASED COLD AIR INFILTRATION
- INCREASED PRODUCTION WITH AN ACCELERATED DRY TIME
